

# Basement drain *Drehfix*

The compact drain for renovation.

The *Drehfix* is a basement drain with integrated, removable backwater valve (Type 5). In addition, it protects connected discharge points such as washbasins, showers or washing machines against wastewater from the sewer. With odour trap, sludge bucket, manually locked emergency closure and a discharge rate of 1.8 l/s, it can be used flexibly and is so compact that it fits in the recesses of old cast iron drains. It is therefore ideally suitable for renovation projects.

1 Drain 2 Inlet

## Basement drain *Drehfix*

For installation in a concrete floor/slab

Made in ABS

With lateral outlet 2.5°, with/without removeable twin flap backwater valve and emergency closure which can be locked by hand, odour trap and sludge trap and integrated, height adjustable upper section.

Drainage capacity 1.8 l/sec flow rate.

Installation area 320 × 190 mm

**Cover:**

Slotted cover 150 × 190 mm made of polymer, black, with Easy Entry Function, class K 3

➤ **Accessories:** see pages 272 – 273
